Contents

Letters to the Editor

Preface to the series of ROSAT publications L1

Results on the X-ray background and sources from the ROSAT Medium Sensitivity Survey
Hasinger, G., Schmidt, M., Trümper, J. L2

Observations of the BL Lacertae objects Mkn 501 and Mkn 421 with ROSAT
Fink, H.H., Thomas, H.-C., Hasinger, G., Predehl, P., Schaeidt, S., Makino, F., Warwick, R.S. L6

The X-ray morphology of the relaxed cluster of galaxies A 2256. I. Evidence for a merger event
Briel, U.G., Henry, J.P., Schwarz, R.A., Böhringer, H., Ebeling, H., Edge, A.C., Hartner, G.D., Schindler, S., Trümper, J., Voges, W. L10

The X-ray morphology of the relaxed cluster of galaxies A 2256. II. Sources around the extended cluster emission
Henry, J.P., Briel, U.G. L14

ROSAT observation of two supersoft sources in the Large Magellanic Cloud
Greiner, J., Hasinger, G., Kahabka, P. L17

ROSAT discovery of bright X-ray sources in globular clusters Ter 6 and NGC 6652
Predehl, P., Hasinger, G., Verbunt, F. L21

A ROSAT glance at the galactic plane
Motch, C., Belloni, T., Buckley, D., Gottwald, M., Hasinger, G., Pakull, M.W., Pietsch, W., Reinsch, K., Remillard, R.A., Schmitt, J.H.M.M., Trümper, J., Zimmermann, H.-U. L24

Discovery of a galactic supernova remnant with ROSAT
Pfeffermann, E., Aschenbach, B., Predehl, P. L28

Observation of soft X-ray emission from the supernova remnant G 18.95-1.1
Aschenbach, B., Brinkmann, W., Pfeffermann, E., Fürst, E., Reich, W. L32

Short time-scale X-ray variability in the AM Her-type binary EF Eridani
Beuermann, K., Thomas, H.-C., Pietsch, W. L36

ROSAT observations of the X-ray halo around GX 339-4
Predehl, P., Bräuninger, H., Burkert, W., Schmitt, J.H.M.M. L40

ROSAT observation of the boundary layer between the white dwarf and the accretion disk of VW Hydri
Belloni, T., Verbunt, F., Beuermann, K., Bunk, W., Izzo, C., Kley, W., Pietsch, W., Ritter, H., Thomas, H.C., Voges, W. L44

β Crateris: another Sirius system in the solar neighbourhood
Fleming, T.A., Schmitt, J.H.M.M., Barstow, M.A., Mittaz, J.P.D. L47

Detection of the coronal line [Fe X] λ6374 in the cooling flow cluster A 1795
Anton, K., Wagner, S., Appenzeller, I. L51

Detection of the ground-state transition of HD0
Schulz, A., Güsten, R., Serabyn, E., Walmsley, C.M. L55

QSO absorption lines and the evolution of galaxies
Fritze-von Alvensleben, U., Krüger, H., Fricke, K.J. L59

First detection of HDO in the atmosphere of Venus at radio wavelength: an estimate of the H_2O vertical distribution
Encrenaz, T., Lellouch, E., Paubert, G., Gulkis S. L63

Laboratory spectra of gaseous zirconium sulphide (ZrS)
Jonsson, J., Lindgren, B., Taklif, A.G. L67

Observations of the narrow nebular lines from the SN 1987 A circumstellar material
Lifan Wang L69

Galaxies underlying F 9 and I 09149-6206
Véron-Cetty, M.P., Woltjer, L., Roy, A.L. L73

Post-perihelion observations of P/Halley. III. An outburst at $r = 14.3$ AU
West, R.M., Hainaut, O., Smette, A. L77

The optical counterpart of the Z source GX 349+2
Penninx, W., Augusteijn, T. L81

Cosmology

Photon stigmata from the recombination phase superimposed on the cosmological background radiation
Fahr, H.J., Loch, R. 1

Dynamical Voronoi tessellation. III. The distribution of galaxies
Zaninetti, L. 291

Substructure in Abell clusters
Rhee, G.F.R.N., van Haarlem, M.P., Katgert, P. 301

From small-scale fractality to large-scale homogeneity: a family of cascading models for the distribution of galaxies
Castagnoli, C., Provenzale, A. 634

Extragalactic astronomy

The large-scale radio continuum structure of the edge-on spiral galaxy NGC 891
Hummel, E., Dahlem, M., van der Hulst, J.M., Sukumar, S. 10

The rotation of accretion disks and the power spectra of X-ray "flickering"
Zhang, X.-H., Bao, G. 21

A star-forming disk in the elliptical galaxy NGC 5173
Vader, J.P., Vigroux, L. 32

Southern extension of the Perseus Supercluster?
Maurogordato, S., Proust, D., Balkowski, C. 39

Formation and evolution of early distortions of the microwave background spectrum: a numerical study
Burigana, C., Danese, L., De Zotti, G. 49

Near-infrared radiation of actively star-forming galaxies
van den Broek, A.C., de Jong, T., Brink, K. 313

A radio-optical study of blue compact dwarf galaxies. I. Radio continuum observations
Klein, U., Weiland, H., Brinks, E. 323

(RN) The distance to the Magellanic Clouds from luminous F supergiants
Arellano Ferro, A., Mantegazza, L., Antonello, E. 341

(RN) Intermediate band photometry of the CP2-star HD 220825 (κ Psc)
Kerschbaum, F., Maitzen, H.M. 346

Internal stellar kinematics of three dwarf ellipticals in the Local Group
Bender, R., Paquet, A., Nieto, J.-L. 349

Galactic structure and dynamics

Generalized Riemann ellipsoids. Equilibrium and stability
Filippi, S., Ruffini, R., Sepulveda, A. 59

Trends in copper and zinc abundances for disk and halo stars
Sneden, C., Gratton, R.G., Crocker, D.A. 354

Solitary vortices in a stellar galactic disk
Korchagin, V.I., Ryabtsev, A.D. 368

Formation, structure and evolution of stars

Rapid photometry of the δ Scuti variable 63 Herculis and of the F 2V star HD 155543: observations and analysis of the time series
Belmonte, J.A., Chevreton, M., Mangeney, A., Praderie, F., Saint-Pé, O., Puget, P., Alvarez, M., Roca Cortés, T. 71

Changes in the binary system parameters resulting from nova explosions
Livio, M., Govarie, A., Ritter, H. 84

The evolution and synchronization of angular-momentum-losing G-type main sequence binaries
Maceroni, C., van 't Veer, F. 91

TZ Fornacis: stellar and tidal evolution in a binary with a fully-fledged red giant (Absolute dimensions of eclipsing binaries. XVII)
Andersen, J., Clausen, J.V., Nordström, B., Tomkin, J., Mayor, M. 99

Advanced stages in the evolution of the Sun
Jørgensen, U.G. 118

The long-term evolution of FU Orionis variables
Hessman, F.V. 137

The parameters R and $T_{\rm eff}$ in stellar models and observations
Baschek, B., Scholz, M., Wehrse, R. 374

Mechanisms for the initiation of detonations in the degenerate matter of supernovae
Khokhlov, A.M. 383

Absolute dimensions of eclipsing binaries. XIX. BW Aquarii: a late F-type indicator of overshooting
Clausen, J.V. 397

The distance to the luminous blue variable HR Carinae
van Genderen, A.M., Robijn, F.H.A., van Esch, B.P.M., Lamers, H.J.G.L.M. 407

A new equation of state for dense matter and fast rotating pulsars
Xuejun Wu, Müther, H., Soffel, M., Herold, H., Ruder, H. 411

Gravitational waves from the collapse of rotating stellar cores
Mönchmeyer, R., Schäfer, G., Müller, E., Kates, R.E. 417

Photometry of yellow semiregular variables: ϱ Cassiopeiae
Zsoldos, E., Percy, J.R. 441

CO observations of bright carbon stars at 230 GHz
Woodsworth, A.W., Kwok, S., Chan, S.J., Murowinski, R. 447

Slowly pulsating B stars
Waelkens, C. 453

Erratum: Statistical equilibrium and photospheric abundance of carbon in the Sun and in Vega
Stürenburg, S., Holweger, H. 644

Stellar atmospheres

Line profile variability of the Be star κ Draconis
Hill, G.M., Walker, G.A.H., Yang, S. 146

CO observations of cold IRAS objects: AGB and post-AGB stars
Likkel, L., Forveille, T., Omont, A., Morris, M. 153

On the nature of HD 93521, a high galactic latitude O-star
Lennon, D.J., Dufton, P.L., Keenan, F.P., Holmgren, D.E. 175

LkHα 198 and V 376 Cassiopeiae: speckle interferometric and polarimetric observations of circumstellar dust
Leinert, C., Haas, M., Lenzen, R. 180

The range of abundances of iron, chromium, and silicon over the surfaces of the CP stars ε Ursae Majoris and θ Aurigae
Rice, J.B., Wehlau, W.H. 195

Models for the radiatively driven stellar wind of early-type stars
Blomme, R. 199

Hanle effect with partial frequency redistribution. I. Numerical methods and first applications
Faurobert-Scholl, M. 469

Asphericity effects in scattering dominated photospheres
Höflich, P. 481

The bright RV Tauri star R Scuti during an exceptional irregular light phase
Lèbre, A., Gillet, D. 490

VLBI observations of HD 193793
Felli, M., Massi, M. 503

The origin of the Ca II and Na I absorptions towards HR 2174
Lagrange-Henri, A.M., Ferlet, R., Vidal-Madjar, A., Beust, H. 507

Diffuse matter in space (including H II regions and planetary nebulae)

(RN) Observations of interstellar lines towards HD 110432
Crawford, I.A. 210

Astronomical and laboratory study of $Si^{13}CC$
Cernicharo, J., Guélin, M., Kahane, C., Bogey, M., Demuynck, C., Destombes, J.L. 213

An extensive study of planetary nebulae in the galactic bulge. III. The observed central star mass distribution
Tylenda, R., Stasińska, G., Acker, A., Stenholm, B. 221

Foreground dust and gas and the extinction curve of the Large Magellanic Cloud
Schwering, P.B.W., Israel, F.P. 231

(RN) The far-UV diffuse background revisited
Pérault, M., Lequeux, J., Hanus, M., Joubert, M. 243

Water masers associated with dense molecular clouds and ultracompact H II regions
Palla, F., Brand, J., Cesaroni, R., Comoretto, G., Felli, M. 249

The jet and energy source of HH 46/47
Reipurth, B., Heathcote, S. 511

Herbig-Haro jets and molecular outflows in L1617
Reipurth, B., Olberg, M. 535

The radio continuum spectrum of partially ionized globules
Pastor, J., Cantó, J., Rodríguez, L.F. 551

Gas and dust in the Ophiuchus region
de Geus, E.J., Burton, W.B. 559

Dense clumps in NGC 2024 – protostellar condensations?
Schulz, A., Güsten, R., Zylka, R., Serabyn, E. 570

The Sun

Center-to-limb variation of the network bright points in the solar photosphere
Auffret, H., Muller, R. 264

The relationship between low-frequency oscillations in the chromosphere and background magnetic fields
Merkulenko, V.E., Polyakov, V.I. 587

The solar system

Ground-based observations of comets Giacobini-Zinner (1984e) and Hartley-Good (1985l)
Landaberry, S.J.C., Singh, P.D., de Freitas Pacheco, J.A. 597

Celestial mechanics and astrometry

Orbital evolution studies of asteroids near the 5:2 mean motion resonance with Jupiter
Hahn, G., Lagerkvist, C.-I., Lindgren, M., Dahlgren, M. 603

A general theory of motion for the eight major satellites of Saturn. II. Short-period perturbations
Vienne, A., Duriez, L. 619

Instruments, data processing, and computational methods

(RN) Polynomial fits for polarization estimation
Stewart, B.G. 280

Abstracts of articles which have been published in A. & A. Suppl. Ser. 88, No. 1, and 88, No. 2

Hβ line profile variability of seven southern Be stars
Mennickent, R.E. 283

Infrared photometry of M 10 red giant stars
Arribas, S., Caputo, F., Martinez Roger, C. 283

Models of hydrogen emission from moving slabs: excitation, ionization and line intensities
Randich, M.S., Giovanardi, C., Natta, A., Palla, F. 283

Fibre spectroscopy and *BV* CCD photometry of the southern open cluster NGC 3114
Sagar, R., Sharples, R.M. 284

Photographic observations of visual double stars
Panjaitan, E., Herdiwijaya, D. 284

Observations of edge-on galaxies at 843 MHz
Harnett, J.I., Reynolds, J.E. 284

CCD photometry in the Vilnius photometric systems. III. Analysis of a region in Lyra
Smriglio, F., Nandy, K., Boyle, R.P., Dasgupta, A.K., Straižys, V., Janulis, R. 284

Studies of Cepheid-type variability. IX. U and V Caeli: *BVRI* photometry of two halo RR Lyrae stars
Hansen, L., Petersen, J.O. 285

Chemical abundances in early B-type stars. II. Line identification and atomic data for high resolution spectra
Kilian, J., Montenbruck, O., Nissen, P.E. 285

The energy-balance temperature of central stars of galactic planetary nebulae. II
Preite-Martinez, A., Acker, A., Köppen, J., Stenholm, B. 285

Photometric and spectroscopic observations of the cluster of galaxies Abell 2390
Le Borgne, J.-F., Mathez, G., Mellier, Y., Pelló, R., Sanahuja, B., Soucail, G. 285

CCD *UBVR* photometry of two old open clusters: King 11 and Be 42. Comparison with theoretical models
Aparicio, A., Bertelli, G., Chiosi, C., Garcia-Pelayo, J.M. 286

Long-term variability of southern hemisphere water masers
Sestokas Filho, B., Scalise Jr, E. 286

CO mapping of bipolar outflows
Phillips, J.P., Mampaso, A. 287

Optical monitoring of quasars and BL Lacertae objects. II
Sillanpää, A., Mikkola, S., Valtaoja, L. 288

RGU-photometric space-densities in a field close to NGC 7006 compared with the gradients predicted by the 5 Basle standard models
Fenkart, R., Karaali, S. 288

Deep narrow band interference filter photographs of selected extended planetary nebulae
Rosado, M., Moreno, M.A. 288

Near-infrared spectra of RV Tauri stars
Mantegazza, L. 288

Carbon stars in the galactic bulge – identification, spectrophotometric and infrared photometric data
Azzopardi, M., Lequeux, J., Rebeirot, E., Westerlund, B.E. 288

The second Henry Draper Extension: spectral types, magnitudes and precise positions for 10 639 stars
Röser, S., Bastian, U., Wiese, K. 289

Multiplicity among solar-type stars in the solar neighbourhood. I. CORAVEL radial velocity observations of 291 stars
Duquennoy, A., Mayor, M., Halbwachs, J.-L. 289

CCD surface photometry of early-type barred galaxies. I. Data reduction and results
Wozniak, H., Pierce, M.J. 289

Redshifts of southern rich clusters
Cappi, A., Focardi, P., Gregorini, L., Vettolani, G. 290

Compact radio sources in the galactic plane near $l=140°$, $b=0°$
Green, D.A. 290

Chemical composition of globular cluster stars. II. Equivalent widths and abundances
Francois, P., Huille, S. 290

Papers accepted for publication in A. & A. 645
